14th CRISE Summer Institute

The objective of the 14th CRISE Summer Institute is to present an introduction to the methods and challenges in programme evaluation in suicide prevention. The three days of activities will provide an opportunity to develop an understanding of the necessary steps in conducting programme evaluations in suicide prevention, from the initial conceptualization to the evaluation of effects and the interpretation of findings. Case studies of local and national evaluation initiatives will be presented to help participants better understand how programme evaluations can be conducted in diverse settings. In addition, the Summer Institute will promote the development of critical judgement concerning tools for estimating suicide risk and ethical challenges involved in suicide prevention programme evaluation.

Who should attend? Professionals, practitioners, researchers, students and anyone else interested in suicide prevention programme evaluation.

Where? Room SU-1550 (Adrien-Pinard Pavilion)
Université du Québec à Montréal (UQAM)
100 rue Sherbrooke Ouest, Montréal

Place-des- Arts
